

The Honolulu Advertiser ran an [interview](#) with the retired Lt. Jim Channon, on whose research the recent film ["The Men Who Stare at Goats"](#) is based. In the article, Channon relates that his work resulted in an Army field manual entitled Evolutionary Tactics, published in 1978. I haven't been able to identify this FM (perhaps it was not distributed?). There is a book entitled [First Earth Battalion Field Manual](#) by Jim Channon for sale, which is supposedly a reprint of the 1978 FM. It doesn't look like any FM I've ever seen, though.
